Education

University of Borås **Borås**

Bachelor's Degree in Systems Science august 2020 - may 2023

- Acquired broad knowledge in business processes and digital technology, covering the entire development lifecycle
- Analyzing business needs and managing data to design and programming.

Experience

Centiro Solutions **Borås**

Software Developer march 2023 - now

- Started out working with smaller Swedish brands to gain hands-on experience in customer projects. After six months, I took on greater responsibility, joining a team supporting a well-known luxury watch brand.
- Worked with a team of four to solve delays in a customer integration project, traveling to Boston, MA, to help realign efforts and get things back on track.
- Built and deployed various customer and carrier integrations, from legacy file-based FTPS solutions to modern API-driven connections.
- Led the implementation of numerous API integrations between Centiro's logistics platform and external systems, making onboarding smoother and improving data flow.
- Contributed to internal tools that improved platform scalability and response times, making daily operations more efficient.
- Diagnosed and debugged complex system issues, using advanced tools to uncover root causes and improve overall system stability.

Mondial Filter AB **Borås**

Part-time Web developer october 2020 - march 2021

- Redesigned the company website, giving it a fresh look and improving user experience, which led to increased traffic and engagement.
- Applied SEO best practices to help the site rank higher on search engines, making it easier for customers to find.

Skills
